## Temporary Works

As a Practice that prides itself on its friendly, innovative and transparent approach we are able to work as part of any team, delivering solutions and maximising value.

Scott White and Hookins is a 60-strong practice providing a comprehensive range of specialist consulting services across both public and private sectors. With offices in Bedford, London and Winchester we are well placed to service clients across the UK.

Scott White and Hookins provide a range of professional consultancy services to the construction industry. We have a specialist team with in depth experience of temporary works design and systems and with three UK offices, our skills are such that we are able to provide temporary works designs for any size of project throughout the UK.

Our range of services includes civil and structural engineering, temporary works design, and project management. Our in house procedures are all quality assured and backed by our professional indemnity insurance.

Our unique strength is gained from a blend of specialist multi-disciplinary railway engineering skills allowing us to provide a truly integrated solution for our clients.

Over the past few years we have successfully developed a specialist team with in-depth experience of designing, detailing, checking, inspecting, and assessing temporary works designs, including:

- Innovative formwork solutions for tunnel linings,
- Propping for large basement structures within sensitive areas
- Falsework support to existing buildings
- Propping for new openings
- Cat 3 checking of designs
- Crane and piling mats
- Specialist temporary works solutions

Our railway staff hold Network Rail PTS cards and London Underground entry cards.
