

## Project Profile :: Secure Establishments

### Waterlooville Police Station

Client: Grist Construction Ltd.

Scott White and Hookins' Role:

 Structural Engineering

 Civil Engineering

A design and build project comprising a contiguous pile basement, reinforced concrete retaining walls, reinforced blockwork walls and a reinforced concrete frame with flat slabs to first and second floor levels.

The upper storey was constructed in steelwork with CHS columns and roof truss members with a north light feature to the central atrium walkway.
