

## Project Profile :: Education

### Bedford College

Client: Bedford College

#### Scott White and Hookins' Role:

 BREEAM Assessors

Target rating- Very Good  
BREEAM **Excellent** Certified

The first ever education project to achieve a refurbishment BREEAM Excellent final certificate rating.

Bedford College's Bruntland Building is a 1960's concrete frame and panel building which required a much needed update.

A £4.3m project to retrofit the College's workshop block into a modern, low-carbon learning centre developed as a resource to showcase the use of alternative energy technologies and energy efficiency techniques in existing buildings.

The building is bursting with the latest green technologies including air source heat pumps, external cladding, a wind turbine, solar panels, automatic lighting, rainwater harvesting and river water cooling, which provides critical data on its performance, benefiting staff, students and the local community.
