

Project Profile :: Industrial

Cosworth's New Advanced Manufacturing Centre Northampton

Client: Cosworth

Scott White and Hookins' Role:

 BREEAM Assessors

Target rating - Very Good
BREEAM **Very Good** Certified

New 38,000 sq ft advanced manufacturing facility for Cosworth in Northampton's Enterprise zone. The building houses a manufacturing system that will produce complex machined components for high-performance, limited-production vehicles with the Client brief requiring a BREEAM Very Good rating.

The scheme included a number of sustainable design initiatives, with the fabric specification maximising the safety, security and responsible sourcing scoring potential as well as the credits gained for both acoustic and thermal performance. Roof mounted PV arrays as part of the energy strategy also helped ensure the scheme achieved its BREEAM rating goals.
