

Project Profile :: Healthcare

Diagnostic Treatment Centre, Winchester

Client: Winchester and Eastleigh
Healthcare NHS Trust

Architect: Studio Four

Scott White and Hookins' Role:

 Structural Engineering

 Civil Engineering

Scott White and Hookins provided full design and construction stage services from outline business case to completion.

The Project consisted of a new 5-storey extension to the existing hospital on a very tight sloping site. The site had limited space for contractor's facilities designed for 2 phases.

The building was required to provide Diagnostic Treatment Centre services, Oscopy Unit, Cancer Care Unit, Short-Stay and Standard Wards and 3 state-of-the-art Operating Theatres designed to take up to 8000 surgical procedures a year.

The new building also provided a new rear entrance to the hospital (at 3rd floor level) which provided a seamless link to the rest of the hospital via the Burrell Wing.
