

Project Profile :: Highways and Infrastructure

Utility Upgrade Works Felixstowe

Client: Trinity College

Contractors:
Utility and Statutory Authorities

Scott White and Hookins' Role:

-  Civil Engineering
-  Highway Engineering

Scott White and Hookins were appointed by the Trinity College to design and project management work for Felixstowe distribution park. The work involved major road refurbishment upgrading of services including a new HV ring main.

The project included assessment of the condition of all existing car park, roads and footpaths, specification of reinstatement works and quality control checking of works carried out on site. We prepared a detailed report and costing together with recommendations on phasing and extent of remedial works.

Our design involved the realignment of a number of footpaths and roads and improvement to allow better circulation of vehicles around the site.
