

Policy

Environmental

Scott White and Hookins is a construction consultancy practice, providing civil and structural engineering and related services from our regional offices in Bedford, Winchester and London.

As a responsible company, we acknowledge that our business and its activities and services have an impact on the environment and are committed to managing and reducing that impact through the adoption of this policy. We are committed to continual improvement of our management system and enhancement of our environmental performance.

We aim to achieve this by implementing an ISO 14001 environmental management system (EMS) and delivering against the following objectives:

- Monitor electricity use and aim to reduce consumption, where practical.
- Monitor gas use and aim to reduce consumption, where practical.
- Monitor paper and toner consumption and see reduction in use.
- Identify and fulfil all legal compliance obligations to relate to our business.
- Ensure staff environmental training needs are met so they can advise sustainable design solutions within our service delivery.
- Continue to implement and look to improve effective waste management in all offices.
- Continue to record and monitor commuting and business travel. Encourage sustainable transport use and reduce travel in single occupancy vehicles.
- Continue to monitor our Scope 1, 2, 3 emissions and publish updated Carbon Reduction Plan, with the overall goal of being net zero by 2045.
- Encourage our suppliers to provide environmental data and set their own net zero targets.
- Continue to review thermal comfort/climate adaptability strategies for each office
- Deliver embodied and operational carbon calculations services in order to help our clients to make informed, sustainable design decisions.

We will seek to achieve these through setting specific objectives and action plans to address them, supported by training and communication as appropriate amongst staff, clients and suppliers.
