

Project Profile: Hotels

Sustainability and BREEAM
Target rating -Very Good
BREEAM **Very Good** Certified

Whitbread Premier Inn,
Cambridge

This BREEAM project involved a new six-storey hotel built on a brownfield site in central Cambridge. .

Client
Whitbread Premier Inn

Scott White and Hookins were appointed from early on in the design and build scheme to help ensure BREEAM criteria were embedded in the developing design, in order to maximise "early" credits that could be gained.

The project scored well across all the BREEAM sections but the early involvement and careful management of site procedures by the Main Contractor ensured high scoring in both the Management and Waste sections.

The project subsequently achieved its targeted BREEAM Very Good rating.
